

Credentialing

2024

What is credentialing?

It is a strategy within the Health Model that consists of the **registration and access to programs** that it aims to carry out as a Public and voluntary Health Insurance, to promote timely care.

This does not have a membership fee, in a non-contributory regime that indirectly contributes to transparency and the fight against corruption.

Credentialing should be seen as a tool for **and access to health** and therefore a **guarantor of human rights**.

Salud

Cuidarse
es prevenir

Servicios de
Salud Jalisco

Specific objectives of Credentialing

- Have a register of beneficiaries from the State of Jalisco.
- Promote social co-responsibility
- Reduce the lack of access to Health Services in the State of Jalisco
- Disseminate the location of Health Units and their portfolio of services
- Grant a tangible access to health, to the population

Services given

This list is enunciative but not limiting and includes actions, strategies and interventions of free services for the population of responsibility of the **OPD** (It means: Decentralized public body) of the Secretary of Health Jalisco:

Salud

Cuidarse
es prevenir

Servicios de
Salud Jalisco

- Medical consultation in the health centers of the OPD SSJ
- Prenatal, gestational and perinatal care
- Disease detection and prevention
- Screening of cardiometabolic diseases
- Screening for breast and cervical cancer
- Family Planning Services
- Health Care for Children and Adolescents
- Vaccination
- Oral Health
- Reproductive Health
- Specialty consultation (Hospitals and Institutes)

Validity of the service

As long as the citizen does not have any rights.

When a person with the right is detected, it is not incorporated into the accreditation strategy, however, the medical care service is not denied.
